### TRANSPORTATION TUESDAY

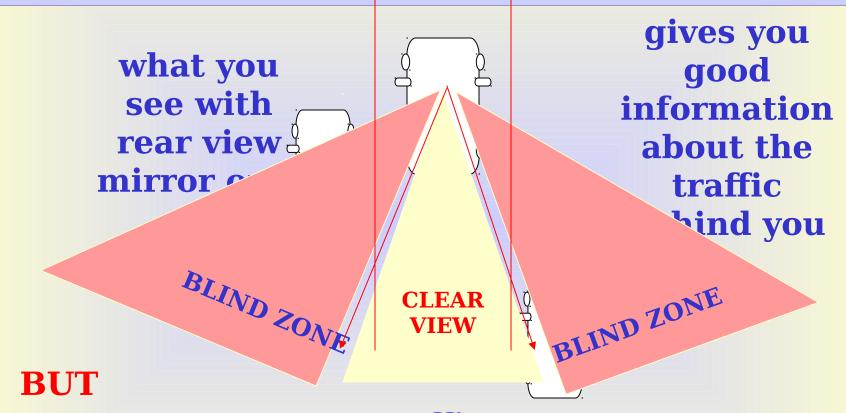

AVOID LANE CHANGE / MERGE ACCIDENTS ...
TURN OUT YOUR SIDE MIRRORS TO REDUCE

BLIND ZONES
Good visibility is no accident

THERE ARE MORE THAN 600,000 LANE CHANGE/ **MERGE ACCIDENTS IN THE** More than 200 people die each year in these accidents. 60% of drivers causing the crash say they didn't see the where replication is the statistics for Middle East - but you see what goes on every day. Transporta

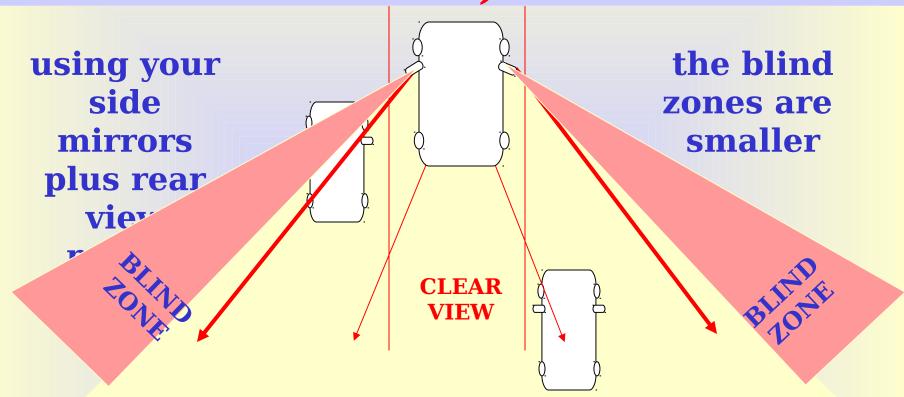

#### YOUR REAR VIEW (INSIDE) MIRROR IS NOT ENOUGH

you cannot see traffic on your left and right until it gets very close

# NORMAL SIDE MIRROR POSITION (YOU CAN SEE THE SIDE OF YOUR CAR)

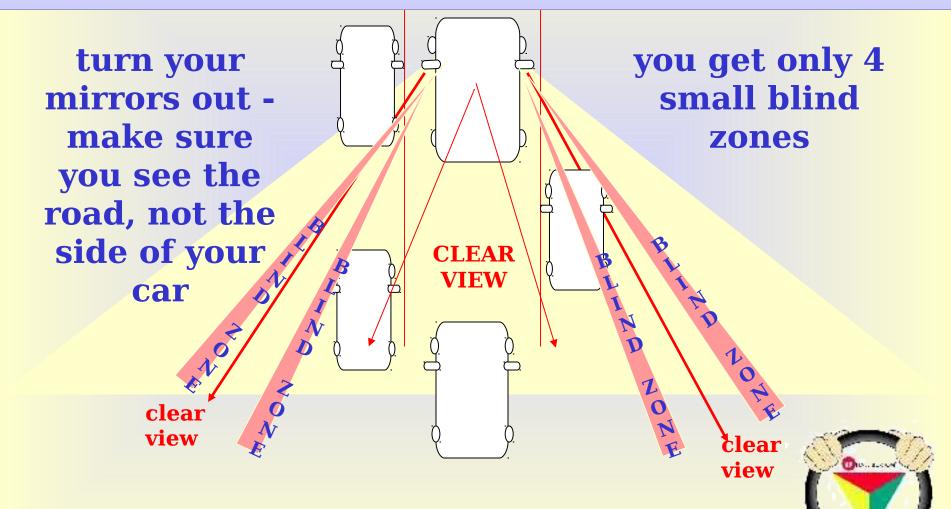

AND other traffic stays in your view for longer

Transporta

#### NEW SIDE MIRROR POSITION (YOU LOOK ALONG THE ROAD, NOT THE SIDE OF YOUR CAR)

you can see other traffic sooner and for Transporta

## FIVE GOOD REASONS TO TURN OUT YOUR

- you don't need to look over your shoulder so often (but it's not a bad idea to do so)
- you need only a brief glance at the mirror to view the blind zone - at highway speeds, turning your head means 30m travelled
- glancing at the mirror leaves the forward scene in your view
- blind zones can be included in your visual scanning (which we're all doing, of course)
- at night no more diagretrom headlights

#### GOOD VISIBILITY IS NO ACCIDENT

It will take time to change your habits and to get used to the new mirror position.
